ARTICLES

Dieter Stolle and Farideddin Peiravian Falling weight deflectometer data interpretation using dynamic impedance 1

M.R. Tayyaran and A.M. Khan Increasing job opportunities in a subregion for region-wide fuel conservation and air-quality improvement 9

P.J. Heffernan and M.A. Erki Equivalent capacity and efficiency of reinforced concrete beams strengthened with carbon fibre reinforced plastic sheets 21

Perry Adebar and Michael P. Collins *Shear strength of members without transverse reinforcement* 30

Terence M. Miles and Barbara J. Lence *Optimization of the city of Winnipeg water distribution system* 42

Robert Tremblay and Siegfried F. Stiemer Seismic behavior of single-storey steel structures with a flexible roof diaphragm 49

S.T. Abdel Gawad, J.A. McCorquodale, and H. Gerges Near-field mixing at an outfall 63

N. Meunier, R.D. Tyagi et J.F. Blais Traitement acide pour la stabilisation des boues d'épuration 76

Amin Ghali, Gamil Tadros, and Paul H. Langohr Northumberland Strait bridge: analysis techniques and results 86

Ezzeldin Y. Sayed-Ahmed and Nigel G. Shrive Design of face-shell bedded hollow masonry subject to concentrated loads 98

A.O. Abd El Halim, D.T. Lau, A.G. Razaqpur, and J.A. Winterink Utilization of the relative rigidity concept to predict the failure of pipe systems under explosive loads 107

Jeff H. Rankin, Stephen L. Champion, and Lloyd M. Waugh Contractor selection: qualification and bid evaluation 117

K.W. Nasser and S. Biswas A new method and apparatus for evaluation of the *K*-slump of concrete 124

Ahmed B. Senouci and Neil N. Eldin A time–cost trade-off algorithm for nonserial linear projects 134

Yee-Chung Jin and Baozhu Li The use of a one-dimensional depth-averaged moment of momentum equation for the nonhydrostatic pressure condition 150

Branko Ladanyi Borehole penetration and expansion devices for ice testing 157

D.M. Masterson Interpretation of in situ borehole ice strength measurement tests 165

Lorne W. Gold Interpretation of field measurements for ice engineering applications 180

D.M. Masterson and W. Graham Development of the original ice borehole jack 186

C. Valeo and I.K. Tsanis Two case studies of dilution models applied to thermal discharges 193

Ian Smith, Ying Hei Chui, and Lin Juan Hu Reliability analysis for critical reaction forces of lumber members with an end notch 202

Clément Drolet, Olivier Banton, Pierre Lafrance, and Jean-Pierre Villeneuve Assessing the fate of polynuclear aromatic hydrocarbons from oily waste land spreading by modelling 211

Saad Bennis, Sylvain Côté et Narut Kang Validation des données hydrométriques par des techniques multivariées de filtrage 218

Mark Fuglem, Ian Jordaan, and Greg Crocker Iceberg–structure interaction probabilities for design 231

M.D. Pandey and M.A. Nessim Reliability-based inspection of post-tensioned concrete slabs 242

John Christian and Tian Xing Xie Improving earthmoving estimating by more realistic knowledge 250

Seshu M.R. Adluri and Murty K.S. Madugula Torsional–flexural buckling strength of steel angles 260

Robert Loov A simple equation for axially loaded steel column design curves 272

S. Mourad, R.M. Korol, and A. Ghobarah Design of extended end-plate connections for hollow section columns 277

Murray C. Temple and Sherief S.S. Sakla Considerations for the design of single-angle compression members attached by one leg 287

NOTES

Otto Svec and Robert Veizer Note on structural strength of asphalt rubber concrete developed through the stone mastic asphalt concept 295

Satish C. Sharma, Peter Kilburn, and Yongquiang Wu The precision of average annual daily traffic volume estimates from seasonal traffic counts: Alberta example 302

Charles Albert New provisions for shear lag in steel tension members 305

BOOK REVIEWS / CRITIQUES DE LIVRES

S.P. Dozzi Construction materials management 310

S.P. Dozzi Cost control of capital projects and the project cost management system requirements 311

M.C. Quick Erosion and sedimentation 312

ARTICLES

Lorne C. Boone, David C. Sego, and S. Peter Dozzi Field performance of thin wall foundations 315

Marc-André Desjardins et François G. Brière Conditionnement et déshydratation de boues d'étangs aérés facultatifs à l'aide du gel–dégel naturel : résultats d'essais 323

Michael Isaacson, Andrew Kennedy, and John Baldwin Wave reflection effects on small craft motions 340

Geneviève Pelletier and Ronald D. Townsend Optimization of the Regional Municipality of Ottawa-Carleton's water supply system operations. I. Model development 347

Geneviève Pelletier and Ronald D. Townsend Optimization of the Regional Municipality of Ottawa-Carleton's water supply system operations. II. Model results and analyses 358

Surabhi K. Shah, Edward A. McBean, and William A. Anderson Preliminary studies into the disinfection of potable water using solar radiation 373

Spyros Beltaos, Brian Burrell, and Sayed Ismail 1991 ice jamming along the Saint John River: a case study 381

Ian D. Moore and Fuping Hu Linear viscoelastic modelling of profiled high density polyethylene pipe 395

M.G. Ferrick, N.E. Yankielun, and D.F. Nelson A Doppler radar for continuous remote measurement of river ice velocity 408

Michael Isaacson and John Baldwin Moored structures in waves and currents 418

Erol Karacabeyli, Peter Lau, C.R. Henderson, F.V. Meakes, and William Deacon Design rated oriented strandboard in CSA standards 431

Amin Ghali and Sami Megally Design for punching shear in concrete: critical review of Canadian Standard CSA-A23.3-94 444

Yohanna M.F. Wahba, Murty K.S. Madugula, and Gerard R. Monforton Effect of guy initial tension on design of guyed antenna towers 457

Paul E. Bryan and Mark F. Green Low temperature behaviour of CFRP prestressed concrete beams 464

W.J. Parker, H.D. Monteith, and H. Melcer Pilot and model studies of toxic organic compounds in municipal sludge digestion 471

Zhong Qi Yue and Isabelle Morin Digital image processing for aggregate orientation in asphalt concrete mixtures 480

Baidar Bakht, John Maheu, and Tatiana Bolshakova Stressed log bridges 490

N.J. Gardner Punching shear provisions for reinforced and prestressed concrete flat slabs 502

T.T. Lie and V.K.R. Kodur Thermal and mechanical properties of steel-fibre-reinforced concrete at elevated temperatures 511

J.D. Innes and E.D. Pugh A model for the environmental screening of highway projects 518

Faye E. Hicks Hydraulic flood routing with minimal channel data: Peace River, Canada 524

C.E. Ventura, A.J. Felber, and S.F. Stiemer Determination of the dynamic characteristics of the Colquitz River Bridge by full-scale testing 536

Roberto M. Narbaitz and Yassine Djebbar Nonparametric modeling of mass transfer coefficients for air stripping packed towers 549

NOTES

G.W. Timco and A.M. Cornett Laboratory tests of ice interaction with steel booms 560

M.A. Sabur and P.M. Steffler A conservative diffusion wave flood routing scheme for channel networks 566

DISCUSSIONS

Donald M. Onysko Floor vibration due to occupants and reliability-based design guidelines: Discussion 571

R.O. Foschi, G.A. Neumann, F. Yao, and B. Folz Floor vibration due to occupants and reliability-based design guidelines: Reply 572

BOOK REVIEW / CRITIQUE DE LIVRE

Jan A. Oleszkiewicz Sewage and industrial effluent treatment 573

ERRATUM

P.A. Irwin, S.L. Gamble, and D.A. Taylor Erratum: Effects of roof size, heat transfer, and climate on snow loads: studies for the 1995 NBC 576

June / Juin

ARTICLES

Said M. Easa, A.O. Abd El Halim, and Yasser Hassan Sight distance evaluation on complex highway vertical alignments 577

Mohammad M. Hamed and Walid M. Abdelwahab Effect of government policies and vehicle marketing strategies on household vehicle demand and fuel consumption 587

J. Marchand, M. Pigeon et L. Boisvert Influence de la température minimale du cycle de gel–dégel sur la détérioration du béton par écaillage en présence de sels fondants 595

J.H.P. Quenneville and J.G.A. Charron Behaviour of single and double 102 mm split ring connections loaded in tension 602

Mustapha Kessal, Mona Edwards-Lajnef, Arezki Tagnit-Hamou et Pierre-Claude Aïtcin L'optimisation de la résistance à court terme des bétons fabriqués avec un ciment de type 20M 614

Manuel J. Rodriguez and Jean-B. Sérodes Neural network-based modelling of the adequate chlorine dosage for drinking water disinfection 621

NOTE

Murray C. Temple Design of single-angle compression members according to the Canadian standards 632

DISCUSSIONS

T. Stathopoulos, A.C. Khanduri, and C. Bédard Prediction of wind load distribution for air-supported structures using neural networks: Discussion 639

Noyal Turkkan and N.K. Srivastava Prediction of wind load distribution for air-supported structures using neural networks: Reply 640

Ralph D. Watts Modelling of a circular-section floating breakwater: Discussion 641

Michael Isaacson, Neal Whiteside, Robert Gardiner, and Duncan Hay Modelling of a circular-section floating breakwater: Reply 641

Mario Fafard, Mallikarjuna Bennur, and Bruno Massicotte On the use of finite element programs in structural evaluation and development of design charts: Discussion 642

A.A. Mufti, G. Tadros, and A.C. Agarwal On the use of finite element programs in structural evaluation and development of design charts: Reply 645

BOOK REVIEW / CRITIQUE DE LIVRE

J.W. Atwater Solid waste landfill engineering and design 647

Papers on the 1995 Kobe earthquake / Articles sur le tremblement de terre de 1995 de Kobe

S. Cherry Introduction to papers on the 1995 Hyogo-ken Nanbu (Kobe) earthquake 650

ARTICLES

Helmut G.L. Prion and André Filiatrault Performance of timber structures during the Hyogo-ken Nanbu earthquake of 17 January 1995 652

S. Kuraoka and J.H. Rainer Damage to water distribution system caused by the 1995 Hyogo-ken Nanbu earthquake 665

Michel Bruneau, John C. Wilson, and Robert Tremblay Performance of steel bridges during the 1995 Hyogo-ken Nanbu (Kobe, Japan) earthquake 678

Donald L. Anderson, Denis Mitchell, and René G. Tinawi Performance of concrete bridges during the Hyogo-ken Nanbu (Kobe) earthquake on January 17, 1995 **714**

Robert Tremblay, Michel Bruneau, Masayoshi Nakashima, Helmut G.L. Prion, Andre Filiatrault, and Ron DeVall Seismic design of steel buildings: lessons from the 1995 Hyogo-ken Nanbu earthquake **727**

Denis Mitchell, Ronald H. DeVall, Katsumi Kobayashi, René Tinawi, and W.K. Tso Damage to concrete structures due to the January 17, 1995, Hyogo-ken Nanbu (Kobe) earthquake **757**

Peter M. Byrne, W.D. Liam Finn, and Carlos E. Ventura The Hyogo-ken Nanbu (Kobe) earthquake of 17 January 1995: seismological aspects and ground motions **771**

W.D. Liam Finn, P.M. Byrne, S. Evans, and T. Law Some geotechnical aspects of the Hyogo-ken Nanbu (Kobe) earthquake of January 17, 1995 **778**

NOTE

Michel Bruneau and Koji Yoshimura Damage to masonry buildings caused by the 1995 Hyogo-ken Nanbu (Kobe, Japan) earthquake **797**

August / Août
